Art Unit: 3728

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. The embodiment shown in figure 1.
- II. The embodiment shown in figures 2 and 15.
- III. The embodiment shown in figures 3-6.
- IV. The embodiment shown in figure 7.
- V. The embodiment shown in figure 8.
- VI. The embodiment shown in figure 9.
- VII. The embodiment shown in figure 10.
- VIII. The embodiment shown in figure 11.
- IX. The embodiment shown in figure 12.
- X. The embodiment shown in figure 13.
- XI. The embodiment shown in figure 14.
- XII. The embodiment shown in figures 17-19.
- XIII. The embodiment shown in figures 22-25.
- XIV. The embodiment shown in figures 26-31.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the attached reference to Haimerl (US Pat 5,285,546) shows all of the claimed common special technical features as claimed in claims 1 and 37 of an outsole (14), an upper comprising an outer material (12a), a functional waterproof layer (16) which extends beyond the end of the outer material (shown in figure 1), and a hot melt adhesive (22). Therefore there is not a single general inventive concept and election of species is required.

Applicant is required in response to this office action to elect a species to be Examined and to provide a listing of the claims which read upon the elected species.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
